

**In the Matter of the Provision of Basic Generation Service (BGS) for the Period Beginning
June 1, 2026**

BPU Docket No. ER25040190

08/6/2025

Question No.: RCR-BGS-39

In reference to the ACE specific addendum, page 19, please indicate if the Company collects usage information from all DCFC chargers located within its service territory. If so, please provide: 1) connected load, 2) peak load, 3) 12 month billed amount, and 4) BGS customer classification. If not, please explain why not.

RESPONSE:

The Company does not collect usage information from all DCFC chargers located within its service territory. Charging stations may not be individually metered, or easily identified in the system as an EV charging specific account.

ACE is providing the following table of billing data for dedicated DCFC sites (defined as DCFC sites that are separately metered and are not co-mingled with non-EV charging load) that the Company is aware of.

ACE continues to update its records as additional sites are identified.

Customer	Site	BGS or Third Party Service	Peak Load (kW)	Annual Usage (kWh)	12 Month Billed Amount (\$)
DCFC Customer 1	1	BGS	60.74	26,122	\$ 16,952
DCFC Customer 1	2	BGS	56.52		
DCFC Customer 2	3	Supplier	75.04	211,353	\$ 46,796
DCFC Customer 2	4	Supplier	79.87		
DCFC Customer 3	5	Supplier	61.12	484,534	\$ 86,162
DCFC Customer 3	6	Supplier	61.22		
DCFC Customer 4	7	BGS	56.83	16,003	\$ 12,396
DCFC Customer 4	8	BGS	50.21		
DCFC Customer 5	9	BGS	24.15	37,568	\$ 15,759
DCFC Customer 6	10	BGS	91.30	30,893	\$ 22,300
DCFC Customer 7	11	Supplier	N/A	160,916	\$ 34,717
DCFC Customer 8	12	BGS	48.80	107,183	\$ 28,005
DCFC Customer 9	13	Supplier	85.62	19,842	\$ 5,233
