

Public Service Electric and Gas Company
Case Name: BGS 2026
Docket No(s): ER25040190

Response to Discovery Request: RCR-BGS-0022
Date of Response: August 05, 2025
DCFC Charger Data

Question:

In reference to the PSE&G specific addendum, page 26, please indicate if the Company collects usage information from all DCFC chargers located within its service territory. If so, please provide: 1) connected load, 2) peak load, 3) 12 month billed amount, and 4) BGS customer classification. If not, please explain why not.

RCR_BGS_0022_2025 DCFC Charger Data.xlsx

Response:

Please see attached Excel file “2025 DCFC Charger Data.xlsx” for the list of customers that have been identified as having meters specifically serving DCFC chargers, including total energy usage, connected load (where available), peak demand, 12-month billed amount, and BGS customer classification (ie. whether the DCFC load is served by a TPS or on BGS). Customers with DCFCs without dedicated meters have not been included. Regarding the 12 month billed amounts, the total (route cycle) billed amounts from July 1, 2024 through June 30, 2025 have been included - and the total billed amounts for customers receiving TPS supply do not include the supply amount if separately billed by their supplier.

Additionally, please note that the attached Excel file includes the requested data for DCFC EV chargers that are participants in its CEF-EV program (Docket No. EO18101111) with dedicated meters, as the requested data is readily available. However, for installed EV chargers (that have dedicated meters) but are not participants in the CEF-EV program, some of the requested data may not be available unless it was provided in their initial load requests.
