Subject: [Commenter 2] Response to RFI - REC Rollover and Redistribution Methodology for Indexed REC

Dear Procurement Administrator,

[Commenter 2], appreciates the opportunity to respond to the Illinois Power Agency's Request for Information on REC Rollover and Redistribution Methodology, dated August 14, 2026.

[Commenter 2] supports rolling over unfulfilled REC quantities within the same technology category to a future procurement event, rather than dynamically redistributing unfulfilled quantities to other technology categories within the same procurement event.

We appreciate the Agency's continued engagement with stakeholders on these procurement design questions and welcomes the opportunity for further discussion.

Sincerely,

[Commenter 2]
