Illinois Power Agency
Procurement Administrator
Fall 2025 Indexed REC RFP

Comments/Questions.

Procurement Administrator,

Please clarify the requirements regarding the Property Configuration, Ownership and PV technology requirements for sites and systems proposed for development of New Utility Scale PV solar projects:

- May multiple, non-contiguous, though closely-proximate sites, be combined as the source for the proposed Indexed RECs?
- May a Coalition or Consortium of property owners submit a proposal combining the energy output from multiple properties and systems? May multiple owners form a Solar Coalition or Consortium for the IPA Index REC Procurement?
- Regarding solar energy system technology and configuration, in addition to standard ground-mounted systems, are roof-mounted and solar canopies over parking areas acceptable?

Thank you and best regards,
